## SPECIAL FEATURES

- Compact** - A new design and an inline boom have allowed us to produce a crane that is much more compact
- Light** - The inline boom reduces the crane's weight. The use of special steel allows an excellent lift to weight ratio. A lighter crane equates to a greater payload on the vehicle.
- Strong** - A traditional boom is very stressed at the boom offset, so it must be heavily reinforced. Our inline design make the torsional stress no longer a factor.
- Modular** - to allow the crane to fit a variety of chassis, we have added a sliding bracket for width from 1' 6" to 3'
