SPECIAL FEATURES

**Optional*

AVPS **Amco Veba Power System**

AVPS system can reach longer outreach with very heavy load, with the highest precision.

RRS **Radio Remote Control**

The operator can control the crane with high precision proportional levers in every position, and in doing so, can supervise the loading and unloading operations. That means a time savings and greater safety. The operator can also control the truck engine start, stop and accelerator with the remote control. All of the remote controls used by AMCO VEBA have an identification code and are shielded from electro-magnetic fields and from external radio signals.

**Only with CE or Radio Remote*

EBB **Electronic Black Box**

Amco Veba has designed this control motherboard to ensure an effective and reliable control of the crane in every working condition. The operator can read on the display all information about the state of the crane, of the accessories and if the routine maintenance. All components are designed according to automotive industry standards and ensure the highest reliability.
